Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US$ 0.20 per page, or a minimum of US$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0028-1298, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 342

No. 1 published on July 13, 1990

J. Sawynok, A. Reid: Supersensitivity to intrathecal 5-hydroxytryptamine, but not noradrenaline, following depletion of spinal 5-hydroxytryptamine by 5,7-dihydroxytryptamine administered into various sites **1**

D. A. Craig, R. M. Eglen, L. K. M. Walsh, L. A. Perkins, R. L. Whiting, D. E. Clarke: 5-Methoxytryptamine and 2-methyl-5-hydroxytryptamine-induced desensitization as a discriminative tool for the 5-HT_3 and putative 5-HT_4 receptors in guinea pig ileum **9**

J. M. Barnes, N. M. Barnes, B. Costall, I. L. Naylor, R. J. Naylor, J. A. Rudd: Topographical distribution of 5-HT_3 receptor recognition sites in the ferret brain stem **17**

G. J. Kilpatrick, A. Butler, R. M. Hagan, B. J. Jones, M. B. Tyers: [^{3}H] GR67330, a very high affinity ligand for 5-HT_3 receptors **22**

R. E. Loiacono, F. J. Mitchelson: Effect of nicotine and tacrine on acetylcholine release from rat cerebral cortical slices **31**

S. Guarini, S. Tagliavini, C. Bazzani, M. Pasini, A. Bertolini: Brain M_3 muscarinic receptors are involved in the ACTH-induced reversal of hemorrhagic shock **36**

C. Acevedo, M. I. Masana, D. Tchercansky, M. C. Rubio: Accumulation of ^{3}H-(±)-noradrenaline by isolated rat liver cells **40**

J. A. Brock, T. C. Cunnane, K. Starke, C. F. Wardell: α_2-Adrenoceptor-mediated autoinhibition of sympathetic transmitter release in guinea-pig vas deferens studied by intracellular and focal extracellular recording of junction potentials and currents **45**

K. Fink, M. Göthert, E. Schlicker: Veratridine and other depolarizing agents counteract the inhibitory effect of Mg^{2+} ions on N-methyl-D-aspartate (NMDA)-induced noradrenaline release in vitro **53**

M. Schmutz, Ch. Portet, A. Jeker, K. Klebs, A. Vassout, H. Allgeier, R. Heckendorn, G. E. Fagg, H.-R. Olpe, H. van Riezen: The competitive NMDA receptor antagonists CGP 37849 and CGP 39551 are potent, orally-active anticonvulsants in rodents **61**

H. H.-W. Suh, L. F. Tseng: Different types of opioid receptors mediating analgesia induced by morphine, DAMGO, DPDPE, DADLE and β-endorphin in mice **67**

R. Patacchini, C. A. Maggi, A. Meli: Capsaicin-like activity of some natural pungent substances on peripheral endings of visceral primary afferents **72**

C. A. Maggi, R. Patacchini, F. Perretti, M. Tramontana, S. Manzini, P. Geppetti, P. Santicioli: Sensory nerves, vascular endothelium and neurogenic relaxation of the guinea-pig isolated pulmonary artery **78**

F. E. Parkinson, B. B. Fredholm: Autoradiographic evidence for G-protein coupled A_2-receptors in rat neostriatum using [^{3}H]-CGS 21680 as a ligand **85**

S.-F. Liu, M. Yacoub, P. J. Barnes: Effect of histamine on human bronchial arteries in vitro **90**

A. Lückhoff, R. Busse: Activators of potassium channels enhance calcium influx into endothelial cells as a consequence of potassium currents **94**

A. Hara, H. Matsumura, Y. Abiko: Beneficial effect of magnesium on the isolated perfused rat heart during reperfusion after ischaemia: Comparison between pre-ischaemic and post-ischaemic administration of magnesium **100**

Short communication

P. Onali, M. C. Olianas: Positive coupling of cholinergic muscarinic receptors to adenylate cyclase activity in membranes of rat olfactory bulb **107**

No. 2 published on August 10, 1990

G. R. Martin, S. J. MacLennan: Analysis of the 5-HT receptor in rabbit saphenous vein exemplifies the problems of using exclusion criteria for receptor classification **111**

S. J. MacLennan, G. R. Martin: Actions of non-peptide ergot alkaloids at 5-HT_1-like and 5-HT_2 receptors mediating vascular smooth muscle contraction **120**

M. Borton, J. R. Docherty: The effects of ageing on prejunctional 5-hydroxytryptamine receptors in the rat vas deferens **130**

L. Ståhle, A.-K. Collin, U. Ungerstedt: Effects of halothane anaesthesia on extracellular levels of dopamine, dihydroxyphenylacetic acid, homovanillic acid and 5-hydroxyindolacetic acid in rat striatum: a microdialysis study **136**

G. D'Agostino, M. C. Chiari, E. Grana, A. Subissi, H. Kilbinger: Muscarinic inhibition of acetylcholine release from a novel in vitro preparation of the guinea-pig trachea **141**

N. M. Rettenmayr, J. F. Rodrigues de Miranda, N. V. M. Rijntjes, F. G. M. Russel, C. A. M. van Ginneken, C. Strohmann, R. Tacke, G. Lambrecht, E. Mutschler: Pharmacokinetic properties of the antimuscarinic drug [^{3}H]-hexahydro-sila-difenidol in the rat **146**

D. Moura, I. Azevedo, S. Guimarães: Differential distribution in, and release from, sympathetic nerve endings of endogenous noradrenaline and recently incorporated catecholamines **153**

E. Schömig, C.-L. Schönfeld, T. Halbrügge, K.-H. Graefe, U. Trendelenburg: The heterogeneity of the neuronal distribution of exogenous noradrenaline in the rat vas deferens **160**

R. Björkman, J. Hedner, T. Hedner, M. Henning: Central, naloxone-reversible antinociception by diclofenac in the rat **171**

E. Tschirhart, C. Bertrand, E. Theodorsson, Y. Landry: Evidence for the involvement of calcitonin gene-related peptide in the epithelium-dependent contraction of guinea-pig trachea in response to capsaicin **177**

T. Kubo, M. Kihara: Modulation of the aortic baroreceptor reflex by neuropeptide Y, neurotensin and vasopressin microinjected into the nucleus tractus solitarii of the rat **182**

R. M. Burch, C. DeHaas: A bradykinin antagonist inhibits carrageenan edema in rats **189**

H.-R. Olpe, G. Karlsson: The effects of baclofen and two $GABA_B$-receptor antagonists on long-term potentiation **194**

I. von Kügelgen, R. Bültmann, K. Starke: Interaction of adenine nucleotides, UTP and suramin in mouse vas deferens: suramin-sensitive and suramin-insensitive components in the contractile effect of ATP **198**

S. Schäfer, C. Linder, G. Heusch: Xamoterol recruits an inotropic reserve in the acutely failing, reperfused canine myocardium without detrimental effects on its subsequent recovery **206**

J. K. Smallwood, P. J. Ertel, M. I. Steinberg: Modification by glibenclamide of the electrophysiological consequences of myocardial ischaemia in dogs and rabbits **214**

M. Galvan, C. Schudt: Actions of the phosphodiesterase inhibitor zardaverine on guinea-pig ventricular muscle **221**

J. Rummel, H. P. Büch: Absorption and metabolism of procaine by the rat small intestine **228**

W. Daniel, K. J. Netter: Alteration of cytochrome P-450 by prolonged administration of imipramine and/or lithium to rats **234**

Short communications

A. Albino-Teixeira, J. J. Polónia, I. Azevedo: Sympathetic denervation causes atrial natriuretic peptide-storing granules to appear in the ventricular myocardium of the rat **241**

I. Azevedo, D. Moura, U. Trendelenburg: Autoradiographic study of the rat vas deferens incubated with ^{3}H-noradrenaline **245**

Erratum

W. Kromer: Reflex peristalsis in the guinea pig isolated ileum is endogenously controlled by kappa opioid receptors (341:450–454) **249**

No. 3 published on September 7, 1990
